▶ Artificial intelligence has benefits, but among its drawbacks is a ravenous demand for electrical power to fuel its countless calculations.

人工智能虽有益处，但其海量计算导致电力需求激增。

▶ And with that, a need for better ways to store data.

 00:19:13

▶ AI systems such as Chad G.P.T. or Copilot are incredibly energy hungry.

如ChatGPT或Copilot等AI系统能耗惊人。

🎧 Its estimated one search on Chad G.P.T. uses almost ten times as much energy as a Google search according to the International Energy Agency.

据国际能源署估计，一次ChatGPT搜索耗能近乎谷歌搜索十倍。

🎧 In generating an AI image, can use as much energy as half a smartphone charge, a study by Carnegie Mellon University and AI Sardar Pugging Face found.

卡内基梅隆大学与AI平台Hugging Face研究发现，生成一张AI图像耗能堪比半次手机充电。

🎧 One London-based Sardar is exploring the question, could holograms be the solution to AI's increasing energy footprint?

伦敦公司HoloMem正探索：全息技术能否解决AI能源足迹？

🎧 While they're not the kind you might know from Star Wars, they are a way to store data.

虽非《星球大战》那种全息，但确属数据存储方式。

🎧 The company Hollumem is using holograms etched onto polymer tape as a low energy high-density storage system.

HoloMem公司用聚合物磁带蚀刻全息图作为低能耗高密度存储系统。

 00:20:00

🎧 Most old data storage technologies, physically a single layer says there is one's become on and off lights and darks.

🎧 We are stacking multiple data sets in the same piece of media, putting far more information in less space than ever before.

🎧 It's predicted that by 2030, data centers could account for about 8% of the world's total energy use.

预测到2030年，数据中心将占全球总能耗8%。

 00:20:21

▶ But Hologram's cartridges don't generate heat, eliminating the need for energy intensive cooling systems.

但HoloMem磁带不产热，无需高耗能冷却系统。

▶ And because the tapes use the same cartridge format as existing hardware, they don't require mass infrastructure upgrades.

因磁带采用现有硬件卡带格式，无需大规模基建升级。

▶ The existing magnetic tape format that we've been using for the last 50 years is in very environmentally fragile.

过去50年使用的磁带格式对环境极度敏感。

 00:20:40

▶ It requires constant thermal and humidity management.

需持续温湿度管控。

▶ Without that ideal environment, you have data rot.

非理想环境会导致数据腐坏。

▶ What's more, the data cartridge capacities that we're seeing simply can't keep up pace with our original data creation.

现有磁带容量已无法匹配数据生成速度。

▶ So they're not fit for capacity, for lights or for cost.

因此在容量、寿命和成本上都不适用。

▶ Hologram claims that their laser-edged polymer tapes will handle up to 200 terabytes of data storage compared to the current industry standard of just 30 terabytes on the cartridge format.

HoloMem称其激光蚀刻聚合物磁带可存储200TB数据，远超当前行业标准30TB。
